Checkout Page Website design

You are required to build a **Pride of Cows checkout page website** with the following elements:

1. **Summary Section**:
List all the products offered, such as premium milk bottles, dairy products (paneer, curd, butter), and other add-ons like subscription packages.

2. **Contact Form Section**:
Users need to provide their name, email, delivery address Section (Pin code, House No, Street Road) for checkout.

Requirements

You need to create a web page for the **Pride of Cows checkout page** that includes:

1.   **Fundamental CSS Layout Techniques**:

   o You can use **Flexbox** for product alignment and content layout.

   o You can use **CSS Grid** for structuring the main sections.

2.   **Summary Section**:

   o Display a list of Pride of Cows products, including:

      § Premium milk bottles

      § Dairy products: paneer, butter, and curd.

      § Subscription packages: Weekly or Monthly plans.

      § Quantity Addition

   o Include pricing and small product thumbnails for better visuals.

3. **Contact Form Section**:

   o A form where customers can enter their details:

      § Name

      § Email

      § Delivery Address & other sections

   o Style the form to be clean, user-friendly, and easy to navigate.

4. **Responsive Design**:

   o Ensure the layout adapts to different screen sizes. (Desktop and Mobile view)

   o Mobile-friendly design with touch-friendly form fields and grids.

5. **Visual Appeal**:

   o Use **clean styling** that aligns as close as the shared image.

   o Add subtle hover effects, clean buttons, and a structured layout.

   o Make sure the **website loads quickly** and works on all devices.

Deliverables

- A fully functional **HTML, JS and CSS** page.
- Source code shared via **GitHub**, CodePen, or a zip file.

Bonus points:

Feel free to add cart functionality with counter when items are added or removed (Not mandatory but good to have)
